COURSES OF STUDY.

CLASSICAL COURSE.

The degree of Bachelor of Arts is conferred upon those who complete this course.

FRESHMAN CLASS.

FIRST TERM.

Latin.—Cicero de Senectute and de Amicitia, (Chase and Stuart.) Composition, (Harkness.)

Greek.—Homer's Iliad, (Owen.) Grecian History, (Smith.) Greek Testament, Gospels, (Tischendorf.) Hadley's Grammar.

Mathematics.—Geometry, concluded, (Olney.)

SECOND TERM.

Latin.—Livy, (Lincoln.) Composition, (Harkness.)

Greek.—Herodotus and Thucydides, (Goodwin.) Composition, (Arnold.) Greek Testament, Gospels, (Tischendorf.)

Science.—Anatomy, Physiology, and Hygiene, (Cutter.) Botany, (Gray.)

Mathematics.—Higher Algebra, (Ray.)

SOPHOMORE CLASS.

FIRST TERM.

Latin.—Horace, (Lincoln.) Roman Antiquities, (Fiske.)
Greek.—Sophocles, (Woolsey.) Demosthenes on the Crown, (D'Ooge.) Greek Testament, Epistles.
Science.—Zoology, (Agassiz and Gould.)
Mathematics.—Trigonometry and Analytical Geometry, (Olney.)

SECOND TERM.

Latin.—Cicero de Officiis, (Thacher.)
Greek.—Memorabilia, (Anthon.) Composition, (Arnold.) Greek Testament, Epistles.
Mathematics.—Analytical Geometry and Calculus, (Olney.)

JUNIOR CLASS.

FIRST TERM.

Latin.—Germania and Agricola of Tacitus, (Tyler.)
Greek.—Plato's Phædo, (Wagner.) Greek Testament, Epistles.
Science.—Natural Philosophy, (Snell's Olmsted.) Chemistry, (Roscoe.)
Logic.—Day's Elements.

SECOND TERM.

Science.—Natural Philosophy, (Snell's Olmsted.) Mineralogy and Geology, (Dana.)
Rhetoric.—Art of Discourse, (Day.)
Politics—Political Economy, (Perry,) or Story on the Constitution.

SENIOR CLASS.

FIRST TERM.

Metaphysics.—Mental Philosophy, (Haven.)
Religion.—Butler's Analogy.
Science.—Astronomy, (Snell's Olmsted.)

SECOND TERM.

Ethics.—Law of Love, (Hopkins.) Evidences of Christianity, (Alexander.)
Belles-Lettres.—Elements of Criticism, (Kames.)
Politics.—Story on the Constitution, or Political Economy, (Perry.)

Throughout the Course.—Class Rhetorical Exercises weekly. Public Rhetorical Exercises twice a term.

Books of Reference.—Liddell and Scott's Greek Lexicon; Anthon's Classical Dictionary; Eschenberg's Classical Literature; Goodwin's and Hadley's Greek Grammar; Grote's History of Greece; Autenrieth's Homeric Lexicon; Goodwin's Greek Moods and Tenses; Long's or Mitchell's Classical Atlas; Andrew's Latin Lexicon; Liddell's or Arnold's History of Rome; Harkness's, or Allen and Greenough's, or Madvig's Latin Grammar; Coffin's Conic Sections.

SCIENTIFIC COURSE.

The Degree of Bachelor of Science or Mistress of Arts is conferred upon those who complete this course.

FRESHMAN CLASS.

FIRST TERM.

Latin.—Cæsar (Chase and Stuart.) Composition, (Harkness.)
Mathematics.—Geometry, (Olney.)
Bible.—Old Testament History, (Smith.)

SECOND TERM.

Latin.—Cicero's Orations, (Chase and Stuart.) Composition, (Harkness.) Virgil's Æneid, (Frieze.)
Mathematics—Higher Algebra, (Ray.)
Bible.—New Testament History, (Smith.)

SOPHOMORE CLASS.

FIRST TERM.

Latin.—De Senectute and de Amicitia, (Chase and Stuart. (Composition, Harkness.)
Mathematics.—Trigonometry and Analytical Geometry, (Olney.)
Science.—Physical Geography, (Cornell.) Geography of the Heavens, (Burritt.) Natural Theology, (Paley.)

SECOND TERM.

Mathematics.—Analytical Geometry and Calculus, (Olney.)
Science.—Physiology, (Cutter.) Botany, (Gray.)
History.—General History, (Anderson.)

JUNIOR CLASS.

FIRST TERM.

Mathematics.—Surveying, (Davies.) Zoology, (Agassiz and Gould.)

Science.—Natural Philosophy, (Snell's Olmsted.) Chemistry, (Roscoe.)

Logic.—Elements of Logic, (Day.)

SECOND TERM.

Science.—Natural Philosophy, (Snell's Olmsted.) Mineralogy and Geology, (Dana.)

Rhetoric.—Art of Discourse, (Day.)

SENIOR CLASS.

FIRST TERM.

Metaphysics.—Mental Philosophy.

Religion.—Butler's Analogy.

Science.—Astronomy, (Snell's Olmsted.)

SECOND TERM.

Ethics.—Law of Love, (Hopkins.) Evidences of Christianity, (Alexander.)

Politics.—Story on the Constitution or Political Economy, (Perry.)

Belles-Lettres.—Elements of Criticism, (Kames.)

Throughout the Course.—Class Rhetorical Exercises, weekly. Those in advanced standing have Public Rhetorical Exercises twice a term.

Day of Prayer for Colleges.....Thursday, January 29
Second term ends.....Wednesday, June 2
Commencement.....Thursday, June 3

COURSES OF STUDY.

The Collegiate Department of Otterbein University offers two full courses of study, the Classical and the Scientific, each requiring four full years for satisfactory completion.

The Classical Course.

This course leads to the degree of Bachelor of Arts, and is, in its general character, identical with that which is offered by the leading colleges and universities of the Union. It requires long and progressive study of the Greek and the Latin Language, Mathematics, Natural Science, Philosophy, History, Political Science, Metaphysics and Morals, and furnishes that knowledge and training which those who are competent to judge pronounce the paramount qualification for any profession or station in life.

The Scientific Course.

This course leads to the degree of Bachelor of Science, and is adapted to the wants of those who for any reason may not desire to spend in study the longer time required to complete the Classical course. It does not require Greek, but will accept Greek, French or German instead of the Latin required. In other respects it is not essentially different from the Classical course, and Classical and Scientific students recite in the same classes if their studies are the same.

Young women as well as young men are recommended to take the Classical course, if their circumstances will at all permit.

Preparatory Courses.

The Preparatory Department fits for the Freshman class any persons who may not have had opportunity, before coming to college, to complete the studies required for admission. It is assumed that the student has passed the more elementary branches, and two years are assigned for the Classical course and one year for the Scientific.

Latin is begun in the first term, and in the classical course Greek in the second term, and the other studies are arranged with a view to the most rapid and thorough prepration for the work of the Collegiate department. It is very desirable that persons who expect to take a course here should enter the preparatory department, unless they have at home unusual facilities for preparation.

DEPARTMENTS.

Philosophy.

In this department are taught mental science in its subdivisions of the intellect, the sensibilities and the will; moral science, theoretical and practical; the evidences of religion and Christianity, as set forth in the Analogy of Bishop Butler, and in the great work of Dr. Alexander; the philosophy of criticism, as related to the beautiful in nature and in art, to style and expression, and to the emotions and the passions; the philosophy of politics and government, as presented in political economy, and in the United States Constitution. These studies cover four and a half terms of five recitations a week, and except a half term, are all in the Senior year.

To this department belongs Logic, a term in the Junior year.

Greek Language and Literature.

In this department, which especially distinguishes the Classical from the Scientific course, are read parts of the great works of Xenophon, Herodotus, Homer, Sophocles, Demosthenes, Thucydides, Plato, and the inspired writers of the New Testament. Believing that, as is said by Bonamy Price, in no language can an equal number of writers of the very first eminence be brought to bear on the formation of a youthful mind as in Greek, we regard the study of this language a prime necessity to one who desires a thorough culture. To secure the largest returns for the labor expended, it is sought to bring to view both the language and the life of the Greeks in their best forms, to present their mythology, their manners, their grand history, their laws and arts; to give ability to translate with facility from Greek to English, and from English to Greek, to master the doctrine of the accents and to write them in composing Greek, and above all to inspire the learner with a real love for the letters and lore of that wonderful people.

In the pronunciation of Greek the continental sounds of the vowels are used, and the written accents are observed.

Written translations, as securing greater accuracy in determining and conveying the thought and more elegance in expression, are required from time to time.

Five terms of Greek may be substituted for the Latin of the Scientific course.

Latin Language and Literature.

In this department there are read selections from Cæsar, Cicero, Virgil, Livy, Horace and Tacitus. In the earlier part of the course more particular attention is given to grammatical forms, idioms and the constructions. The antiquities, history and arts of the ancient Romans are made the subject of special study. Careful attention is given to the translation of English into Latin, and in every class it is designed to acquaint the student with

the facts of history or of doctrine, and to give him that culture which the Latin monuments can not fail to impart to one who faithfully yields himself to be instructed by them.

In Latin the so-called English method of pronunciation is used, as set forth in Harkness's Grammar.

Mathematics.

The course in mathematics begins in the Preparatory years with Arithmetic, Algebra, and Geometry, and proceeds through the Freshman and the Sophomore year. The branches taught in College are Geometry, with instrumental practice in drafting figures and problems, Higher Algebra, Plane and Spherical Trigonometry, Analytical Geometry, Calculus and Surveying. The classes in Surveying are employed in actual field work, and good surveying instruments are owned by the University and used for this purpose.

Recitations are accompanied by lectures at appropriate times.

Natural Science.

The subjects taught in this Department are Physical Geography, Natural History, Botany, Physiology, Zoology, Physics, Chemistry, Mineralogy, Geology, and Astronomy. There are daily recitations or lectures in this Department from the first to the last year of the course, and frequent experiments are given in illustration of the subjects studied. The University has recently expended a large sum, under the direction of the Professor of Natural Science, in the purchase of the most recent and improved apparatus for illustrations in Chemistry and Physics, and the Laboratory has an outfit of the best tools and appliances. The cabinet contains a very interesting collection of specimens in Geology, Mineralogy, and Natural History. It is very desirable that constant additions be made to these, and donations will be very thankfully received by the Professor.

English Language and History.

In the very beginning of our courses of study a careful and systematic study of the English language is required. The structure and uses of the language are constantly illustrated in practice, through the required literary exercises, introducing the study of the best models and careful attention to original composition, so that the student may be trained to use the vernacular accurately and elegantly. To this end a systematic treatise on composition and expression (Higher Lessons in English) is introduced early in the course, and in the Junior year Day's Art of Discourse is taken.

In the Rhetorical Classes, one of which each student is required to join, special instruction is given in the use of capitals, punctuation. rhetorical figures, force and elegance of expression and delivery. In all class work, whether in the languages, science, mathematics, or elsewhere, the oral expression is in English, and it is sought at all times to make the expression accurate and perspicuous. Thus, whatever may be the study, the student may expect that his training in English will not be neglected, but will receive constant attention. It is desired, also, that every student have a thorough acquaintance with English literature, and every means to secure this will be encouraged.

Connected with a history of our language will be taken a course in the history of the world, of necessity somewhat cursory, but intended to accompany and direct a wider range of reading in special fields, in which the history of our own country will be made prominent.

COURSE OF STUDY.

The branches taught are Piano, Pedal Organ, Violin, Viola, Violincello, and Theory. Three years of Violin may be substituted for the Organ.

The following is an outline of the work required:

Piano.

Selections from Enckhausen, Op. 53 and 58; Krause, Op. 4; Czerny, Op. 849; Loeschorne, Op. 52; Kohler, Op. 50; LeCouppey, Op. 20; Czerny, Op. 636; Heller, Op. 47 and 45; Czerny, Op. 299; Krause, Op. 15; Rosellen, Op. 60; Heller, Op. 16; Inventions by Bach; Steibelt, Op. 78; Czerny, Op. 740; Moscheles, Op. 70.

Also, selections from Beethoven, Mendelssohn, Bach, Clementi, Mozart, Kuhlan, Schumann, Steibelt, and others.

Organ.

Selections from Brauer, Rinck's "Organ School," "Pedal Technics" by Thayer, Buck's "Pedal Phrasing," Studies by Volkmar.

Also, selections from Buck, Hesse, Lemmens, Andre, Rinck and others.

Theory.

Parker's and Richter's Manuals of Harmony, and exercises in harmonizing Basses and Melodies.

Terms.

For any of the above instruments, Ten Dollars, for the Term of Ten Weeks.

No deduction made for absence from lessons, except in case of protracted illness.

Not less than two lessons a week given under any consideration.

Convenient and well furnished music rooms are provided in the University buildings, and a good supply of instruments, including a powerful pedal organ and pianos of the best makers, will be used in this department.

The aim is to impart a thorough education in both theory and practice, and a constant improvement in facilities and in work will be sought.

FINE ARTS.

In this department Crayon and Pencil Drawing and Oil Painting are taught in special classes, and every facility for rapid progress is afforded.

PENMANSHIP AND BOOKKEEPING.

The teacher of Penmanship offers, to any who may desire, instruction in Plain and Ornamental Penmanship, Card Writing, Flourishing, and all other branches of the art. Lessons in Double and Single Entry Book-Keeping, with practical exercises, will also be given as demanded.

GENERAL INFORMATION.

Terms and Vacations.

The College Year comprises two terms and two vacations.

The Annual Commencement is held on the first Thursday in June.

After a vacation of ten weeks, the first term opens on the second Wednesday in August, and continues nineteen weeks.

After a vacation of three weeks, the second term opens on the second Wednesday in January, and continues twenty weeks to Commencement.

Terms open on Wednesday and close on Tuesday.

Absence from College exercises during term is prohibited, unless special permission has been previously obtained.

Admission.

Young women and young men are admitted to the courses of study on perfect equality and recite in the same classes.

Candidates for admission must present to the President or the Principal satisfactory testimonials of good character. Of those who come from another institution of learning a certificate of honorable dismission will be required.

Candidates for admission to the Freshman Class will be examined in the preparatory studies prescribed in this catalogue for the course which they desire to pursue.

Candidates for advanced standing must pass a satisfactory examination in all the studies passed by the class which they propose to join. Real equivalents will be accepted.

Students who come from any one of the other Colleges controlled by Conferences of the United Brethren in Christ, or from Roanoke Academy, will be admitted without ex-

amination on such studies as the Faculty of such institution may testify that they have passed.

Those who propose to become students in the University will find it greatly to their advantage to present themselves and begin their work promptly at the beginning of a term. No student can absent himself from regular exercises, if only for a very short time, without real loss.

Examinations.

Public written examinations of all the classes are held at the close of each term.

These examinations are reckoned as equivalent to half of the work of the term in estimating the student's standing.

No student who omits attendance upon an examination in any study will receive a grade in the study, or be regarded as having finished it until the examination is passed.

Any student who fails to receive a grade of sixty-five hundredths in any study, will be required to submit to a second examination, after further preparation, or will repeat the study with the next lower class.

The examinations in the regular studies of the Senior Year will be held four weeks before Commencement.

Religious Instruction.

This University was founded by men of faith and prayer, and is supported by the offerings of the pious. It is the desire of the managers that a positive influence in favor of a genuine Christianity be exerted in every department of its work.

Devotional exercises are attended in the Chapel every morning, except Sunday, at a quarter to nine o'clock. All students are required to be present.

Regular recitations are heard during the year in Bible History and in the Greek of the New Testament.

A students' prayer meeting is held at 6 P. M. every Tuesday, during term.

The International Bible Lessons are taught in classes every Sunday morning at 9 o'clock. Here students are engaged either as teachers or as learners, and all members of the institution are urged to participate.

A Sunday School Normal Class recites to the President once a week—a valuable means of improvement for those who wish to prepare for Sunday School work, or to increase their store of information on Bible topics.

Divine Service is held at half-past ten every Sunday morning in the Chapel. All students are required to attend, except such as have permission, under the rules, to attend service elsewhere.

Government.

There is kept by the Faculty an accurate record of the work of each student, and in this record are entered the grades attained in each study and the demerit marks, if any, arising from absence from recitation, chapel and public worship, and from other violations of the rules. This record is publicly read at the close of each term, and a copy preserved for reference.

A printed copy of the rules of the University may be obtained by any student, and every student is expected to acquaint himself with them. "*Ignorantia legis neminem excusat.*" The penalties inflicted for infraction of the rules may be (1) private reprimand, (2) public reprimand, (3) suspension, (4) dismission, (5) expulsion.

If it shall become evident that a student is deriving no profit from his connection with the University, or is the instigator or promoter of lawlessness, he may be privately dismissed, after admonition has failed to reclaim him, even though no overt act, by which he may be criminated, be detected.

Saum Hall.

Young women from abroad, unless otherwise directed by the Faculty, will board and lodge in Saum Hall, which is under the immediate supervision of the Principal of the Ladies' Department, and is governed by special rules.

Ladies who desire to take rooms in Saum Hall should, before coming to Westerville, correspond with the Principal, stating the class they propose to enter, and the time they expect to remain.

Library.

The University Library consists of over one thousand well-selected volumes, besides pamphlets, all obtained since the great fire of 1870, and nearly all fresh publications. Books are added from time to time, as they are obtained by donation and by purchase.

The library room contains also the libraries of the literary societies.

Connected with the Library is a Reading Room furnished with many of the best religious papers, newspapers and magazines.

To the library and reading room students have access at a stated hour each day, and all are urged to make use of this means of improvement.

The Library fee has been abolished, and hereafter admission to the library and the reading room will be free to all members of the University.

Literary Societies.

A very valuable means of improvement is that afforded by the Literary Societies. There are four of these societies, two conducted by the young men, the Philophronean and the Philomathean, and two by the young ladies, the Philalethean and the Cleiorhetean. All the societies are in a prosperous condition, and each has a commodious and well furnished hall and a valuable library. Students of the University are advised to unite with one of these societies; but should the Faculty deem the success of a student in his proper collegiate duties, at any time, unfavorably influenced by his connection with his Society, he may be required to withdraw, temporarily or permanently.

Lectures.

In addition to the class lectures on special topics in each Department, students are afforded, from time to time, opportunity to hear the most distinguished lecturers of the country.

During the present year lectures have been given by the following persons:

SUSAN B. ANTHONY,
ABBY SAGE RICHARDSON,
PRESIDENT J. B. ANGELL,
" W. H. SCOTT,
PROFESSOR S. J. WILSON,
HONORABLE GEORGE WENDLING,
" WILL CUMBACK.

In recent years lectures have been given in the University by Bayard Taylor, Wendell Phillips, Fred. Douglass, Schuyler Colfax, Paul du Chaillu, Dr. John Lord, and others.

Aid to Students.

The entire fee for tuition is remitted to children of superannuated and itinerant ministers of the Church of the United Brethren in Christ.

The Board of Education of the same Church will, during the next year, offer some pecuniary aid to young men preparing for the ministry. It is hoped that the laudable efforts of this Board will be rewarded by so liberal contributions, that in subsequent years a large sum may be devoted to aiding worthy students.

Young men of limited means, who come to this University, will be advised by the Faculty in regard to means of obtaining a support or of defraying part of their expenses. It is believed that no person, however poor, if he be energetic and willing to work, need despair of completing a course of study here.

The cost of living in Westerville is much less than in the midst of a large population. Many students obtain rooms for a small sum and form boarding clubs, thus reducing their expenses to a small amount. Industrious students usually find remunerative work out of the hours of study, and spend vacations in some profitable employment.

EXPENSES.

Tuition in all the classes is six dollars a term, of nineteen weeks. Incidental fee is nine dollars a term.

Boarding will cost from $1.00 to $3.50 a week.

Rooms may be obtained, either with or without care of room, for 25 cts to $1.00 a week, according to location. No rooms for young men are provided in the University buildings.

Wood may be had at $1.50 a cord delivered, and stove-wood, ready for use, at $2.00.

Coal is extensively used, and dealers deliver it at $2.00 a ton for soft, and $7.00 a ton for hard.

Annual Expenses.

Tuition and Incidental fees	$30.00	to	$30.00
Rent and care of room	10.00	to	40.00
Boarding, 39 weeks	39.00	to	136.50
Text books	10.00	to	20.00
Fuel, light and washing	7.00	to	20.00
	$96.00	to	$246.50

Doubtless some students find it quite easy to expend a larger sum than $246.50 without believing themselves to be extravagant; but it is equally certain that a year in College costs less than $96.00, cash, to some who are not aware that they deprive themselves of any necessaries or practice great self-denial.

Location.

Otterbein University is located in Westerville, Franklin county, Ohio, on the Cleveland, Mt. Vernon and Columbus Railway, twelve miles north of Columbus, in a district of great fertility and salubrious climate. Situated in a quiet town, it is yet within easy reach of the Capital City, and has railway connections with all the large cities of the state and country.

A public conveyance makes connection with Westerville Station, on the Cleveland, Columbus, Cincinnati and Indianapolis Railway, three miles west of the University.

ALUMNAL ASSOCIATION.

The Association of the Alumni of Otterbein University was formed in 1863, and the rolls showed in 1878 a membership of 183. Only those who have received a degree in course in this University are admitted to membership.

OFFICERS.

PRESIDENT.

HENRY GARST, A. M..... ..... Class of 1861..... Westerville.

VICE PRESIDENTS.

M. A. FISHER, M. A..... Class of 1858..... Westerville.

Addie Wilkerson ..... "
John F. Zent ..... "

Number of Students, 59.

COURSES OF STUDY.

The courses of study in Roanoke Academy are the same as the Preparatory courses in the University, but the elementary branches in English and in Mathematics, not included in the University courses, are taught in the Academy.

Location.

The Academy is located in the village of Roanoke, Ind., on the Toledo, Wabash & Western Railway, eighteen miles south-west of Fort Wayne.

Roanoke Academy is now under the control of the Trustees and Faculty of Otterbein University, who will exercise a superintendence over it, furnishing the teachers and controlling the scheme and methods of instruction, but assuming no financial responsibility. It is designed to make the Academy a valuable aid to the University, in preparing young persons for admission to the Freshman class.

The charges for tuition are exceedingly low, and parents who may entrust their children to this school will be assured of their careful training.

BEQUESTS.

In order to suggest to persons of means the propriety of leaving in their wills a sum of money to Otterbein University, to be used in Christian work and for human elevation, so that after they have rested from their labors, their works may follow them, we give the following

Form of Bequest.

I give and bequeath unto the Board of Trustees of Otterbein University, located at Westerville, Ohio, the sum of ..... *dollars, to be paid out of my estate within one year after my decease; and the receipt of the General Agent of said University shall be a sufficient voucher for my executors.*

[*Signed.*] .....
